WORK

Oct 2019 - March 2020

Founders & Coders • Student Developer

Founders and Coders is a cooperative that runs a **highly selective** programming course. Through pair programming and workshops, I have grown competent with accessibility, testing, authentication, Git & version control, **database** & file architecture. I am comfortable with JavaScript fundamentals and ReactJS, learning to build products with cross device functionality. Mentoring and presenting regularly has reinforced my confidence and understanding.

In collaboration with real clients, the 4 month course culminated in the production of an MVP.

Student Project • Signpost

UX Lead

Conducted **user research** to define UI for specific UX target audience of homeless people. Used tools like **Figma** to create an iconised, clean design.

Tech for Better • Safe Space (Musician's Union)

Scrum Master

Liaised with the **product owner** throughout the process from definition to handover. Guided the team and lead **stand ups**.

Jan 2019 - Oct 2019

Together for Mental Wellbeing • HR Administrator

A mental health charity rooted in service user involvement. What originally made me want to learn programming was being able to use it for social impact. I wanted experience of this environment before entering the tech world, and I gained a broad understanding by being part of the team at Together. In addition to this, I developed **organisational** and **team work** skills, as well as insight to the functioning of a charity on all levels. .

SKILLS

Frontend	Backend	Testing	Tools	Methodologies
JavaScript ES6	NodeJS	Tape	Figma	Pair Programming
ReactJS	REST APIs	Travis CI	Git	Agile
Styled Components	ExpressJS	Cypress	Eslint	
HTML 5	Handlebars		VS Code	
CSS	PostgreSQL		Atom	
	Lambda			

EDUCATION

2014 - 2018 University of Manchester - BA Latin American Studies 2:1

- Spanish language - 1st distinction
- Year Abroad - 10m working with **NGOs in Colombia**
- Dissertation
- History, economics and politics
- Culture, arts and literature
- Sociology and anthropology
